Outer Burial Containers

Traditionally, the purpose of an outer burial container is to protect the casket from the weight of the earth above and to prevent the entrance of outside elements. Outer Burial Containers—or “vaults”—are not required by law, but cemeteries may require them if they so desire.

At Fernwood, we may require an outer burial container in the traditional sections of the cemetery, but only when it is absolutely necessary for health, safety, or ecological reasons. Installation fees are additional and are based on type of vault and material. Outer Burial Containers are not permitted in the natural burial sections.
